Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121 and 372:

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT 13.1:

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 1-8 and 14-16, drawn to a purified compound having the following chemical formula (1) and method for improving hyperglycemia which comprises administering a compound having the following chemical formula (1).

Group II. Claims 9-13, drawn to a first method of making the compound/composition and a second method of making of making the compound/composition.

The inventions listed in Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1, because under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of each composition and/or method: The special technical feature of Group I is drawn to a purified compound having the following chemical formula (1) and method for improving hyperglycemia which comprises administering a compound having the following chemical formula (1) and the special technical feature of Group II is

drawn to a first method of making the compound/composition and a second method of making of making the compound/composition.

Thus, Groups I-II are unrelated compositions and/or methods because Group II invention is obtaining/making compounds extracted from the claimed species instead of obtaining/making the claimed purified compounds of Group I invention extracted from the claimed species. Thus, Group II invention would require different steps to make Group I invention's purified compound.

For the reasons above, the inventions of Groups I-II do not share a special technical feature.

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirements be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randall Winston whose telephone number is 571-272-0972. The examiner can normally be reached on 8AM-5PM.
